# **SYLLABUS**

100 DAYS OF CODE
COMPLETE
PROFESSIONAL
PYTHON BOOTCAMP

APP BREWERY

www.appbrewery.co

#### **BEGINNER PYTHON**

- Variables in Python
- String Manipulation
- Input and Print Functions
- Variable Naming Rules
- Mathematical Operations in Python
- DataTypes
- Converting types
- Conditionals IF/ELIF/ELSE
- Logical Operators
- Randomisation
- Error Handling
- Functions
- For Loops
- · Code blocks and Indentation
- While Loops
- Flowchart Programming
- · Positional and Keyword Arguments
- · Python Dictionaries and Lists
- Nested Collections
- Returning Functions
- · Return vs. Print
- · Doc Strings vs. Comments
- Scope and Local/Global Variables
- · Debugging Techniques

## INTERMEDIATE PYTHON

- Local Development Environment Setup
- PyCharm Tips and Tricks
- Python Object Oriented Programming
- · Creating Classes in Python
- Using External Python Modules/Import
- Getting / Setting Attributes
- Python Methods
- Class Initialisers
- Module Aliasing
- Optional, Required and Default Parameters
- Event Listenters
- Python Instances and State
- Python Turtle
- · Game Development with Python and OOP
- Python Inheritance
- Python Slice Function
- File I/O Reading and Writing to Local Files
- File Directories
- · Reading and Writing to CSV
- Introduction to the Pandas Framework
- List Comprehensions
- · Dictionary Comprehensions

## **SYLLABUS**

100 DAYS OF CODE

COMPLETE

PROFESSIONAL

PYTHON BOOTCAMP

- Packing and Unpacking Functions in Python
- · Creating Desktop GUI Apps with Tkinter
- Strongly Dynamic Typing
- · Error Handling and Exceptions
- Try / Except/ Raise
- Working with JSONs
- Local Persistence
- Sending Email with Python and SMTP
- · Working with date and time
- Hosting Python Code Online with PythonAnywhere

### INTERMEDIATE +

- APIs
- Making HTTP Requests with the Requests module
- · Sending Parameters with the Request
- APIs with Authentication
- Sending SMS with Python
- Web Scraping with Beautiful Soup
- Browser Automation with Selenium Web Driver
- Automating Tinder
- · Automating Twitter
- Automating LinkedIn
- · Automating Instagram
- Web Development with Flask
- Command Line
- Python Decorators
- · Templating with Jinja 2
- WTForms

#### ADVANCED PYTHON

- Build Your Own REST API with Python
- Build Your Own Blog
- Databases with SQLite
- Dataframe Inspection
- Data Cleaning
- · Sorting Values in Dataframes
- Arithmatic Operations with Pandas
- Creating Pivot Tables
- Chaining Functions
- Smoothing Time Series Data
- · Creating Line Charts with Matplotlib
- Using Jupyter Notebook
- HTML Markdown
- · Creating Scatterplots with Matplotlib
- Relational Database Schemas
- Descriptive Statistics
- Creating Bar Charts, Pie Charts, Donut Charts, Box Plots with Plotly
- Creating NumPy NDArrays

## **SYLLABUS**

100 DAYS OF CODE
COMPLETE
PROFESSIONAL
PYTHON BOOTCAMP

- Array Slicing and Subsetting
- Matrix Multiplication
- Bitwise and Operators in Pandas
- Creating Bubble Charts with Seaborn
- Running Regressions with Scikit-Learn
- Non-Parametric Regression
- Students T-Tests and Histograms with Scikit-Learn
- Multi-Variable Regression
- Log Transformations
- · Residuals Analysis

# PROFESSIONAL PORTFOLIO BUILDING INDEPENDENT ASSIGNMENTS

- Text to Morse Code Converter
- Portfolio Website
- Tic Tac Toe Game
- Image Watermarking App
- Typing Speed Test
- Breakout Game
- · Cafe and Wifi Website
- Todo List Website
- Disappearing Text Writing App
- Image Color Palette Generator
- Custom Web Scraper
- · Automating the Google Dinosaur Game
- Space Invaders Game
- Custom API Driven Website
- An Online Shop
- Custom Browser Automation
- Analyse and Visualise the Space Race
- Analyse Deaths Involving the Police in the US
- Predict Earnings using Multivariable Regression
